

#bot_room

The **#bot_room** channel offers various bot commands you can use for a bit of fun, including trivia quizzes, gambling with pretend money and image manipulation.

Trivia

Only one trivia quiz can be played at once in a channel. You may create a thread if you want to start another.

A trivia quiz can be started with `.trivia <category>`, where available categories can be listed with `.trivia list`. Once started I Want Die will ask questions on the selected topic, granting points to the first user who types the correct answer. The first user to reach 20 points will win the quiz. The quiz will also end if several questions in a row go unanswered, or if I Want Die runs out of questions.
