

Block Wrench

In order to see the wrench texture, the [RTGame Server Resource Pack](#) must be installed, The wrench will still function without the Resource Pack.

The block wrench allows rotation of certain blocks without having to mine and replace them. This can be convenient for modifying redstone circuitry or incorrectly rotated terracotta.

Rotatable blocks

The block wrench can be used to rotate the following blocks:

- Redstone Repeater
- Redstone Comparator
- Observer
- Piston
- Sticky Piston
- Dropper
- Dispenser
- Hopper
- Glazed Terracotta

Obtaining

The Block Wrench can be crafted using 3 gold ingots and 1 iron ingot at a Crafting Table.

Recipe for the block wrench

Using

Once a Block Wrench has been obtained, it can be used to rotate blocks by right clicking them. The target block will cycle through all possible rotations one at a time. Block states such as repeater

delay and any items contained within the block will be preserved.

The Block Wrench can also be used from the offhand if the main hand is empty, but will require sneak right-clicking for some blocks.
