

The Nether

The Nether Hub

The Nether Hub is a prebuilt structure located at the Nether equivalent of the overworld spawn point. It features a portal to the overworld, 4 interconnected ice highways for fast transport to other areas of the Nether, and space in the corners for player-created communal areas.

Ice Highways

There are four Ice Highways which interconnect at the centre of the Nether Hub. Each highway has a colour - Yellow, Blue, Green and Purple, for directions North, East, South and West respectively. Players can expand the highways to provide quick and efficient transportation through The Nether.

Directories

Only Staff and Trusted players can add locations to the directories

The Nether Roof

Access to the Nether Roof is allowed for easier travel by any of the usual means. If you would like some bedrock to be removed for easier access, please ask in a [ModReq](#) and we will remove it for you.

Please note that mob spawns are disabled on the Nether Roof.
